

HK-2300

# Alkaline Water Bottle

HK-2300 creates healthy water through a natural reduction system that uses a filter made of hydrogen-reducing substances and natural minerals.

## 1. Instructions for Use

- 1) For first-time use, rinse the product in running water.
- 2) Pour general drinking water or purified water. Do not overfill.
- 3) Gently shake for 20 times and drink after 20 minutes.

## 2. Cleaning and Storage

- 1) Place the product in a clean area to avoid contamination.
- 2) Clean the production area every 15 days according to the instructions.
- 3) Do not leave the bottle under direct light for a long period of time.
- 4) Store with the cap on.

## 3. Cleaning instructions

- 1) Rinse as follows if ceramic in the container turns into dark grey color.
- 2) Dilute 5 g of citric acid or 2 teaspoons of vinegar in approximately 100 ml of water.
- 3) Add diluted citric acid or vinegar to the container, and shake the container for about 20 times.
- 4) Discard the solution and rinse the container with clean water.

## 4. Cautions

- 1) Do not use for any other drink (e.g., tea, juice, soda, etc.) than water or warm water.
- 2) Do not eat the filter material inside the filter.
- 3) Do not disassemble or reassemble the filter.
- 4) Do not boil or place the filter in hot water.
- 5) Do not take pills or other medicines with alkali ionized water.
- 6) Consult with your doctor before using for the first time. Start with a small volume of alkali ionized water with a near-neutral pH level.
- 7) Recommended daily amount for drinking is 500–1,000 mL.
- 8) Do not store or drink alkali water in other bottles.
- 9) Do not use hot water.
- 0) Do not drink water used for rinsing.
- 11) At first use and at least once a month thereafter, ensure that the pH level is in range of drinking by using a pH rod or the color development method.
- 12) If the measured pH level is lower than 8.5, rinse the filter according to the instructions.

## 5. Environment and Conditions for Use

- 1) Do not use water unfit for drinking.
- 2) Do not use in high-temperature and humid areas, such as bathrooms or saunas.
- 3) Do not use in a chemical storage or gasification area.
- 4) Conditions for use: Temperature (–5 to +30°C); humidity (ambient humidity); air pressure (ambient pressure)

# Alkaline Water Bottle

## Premier Features of HK-2300

- Increases pH level and mineral contents
- Increases reducing power by generating hydrogen
- Enhances antioxidative activity and removes reactive oxygen

## Specifications

- Product name : Alkaline water bottle
- Model name : HK-2300
- Material : External (PC), cap (PP+PE)
- Interior of the filter (Mg, alkali ball, far-infrared light ball, tourmaline)
- Weight and packing unit : 136 g, including filter; 1 set
- Validity : 12 months
- Reaction time : Available for immediate drinking after filtration
- Original water condition : General drinking water or purified water
- Manufactured by : HK CO., LTD.
- Distributed by : NEW LIFE MEDICAL CO., LTD.
- Address : россия, приморский край, г. уссурийск, ул. беляева 13
- Phone number : 8(4234) 33-05-94
- Web site : [www.nlmed.ru](http://www.nlmed.ru)

Please maintain appropriate pH level and ensure to use within the pH duration period.

- Capacity per treatment : 600 mL
- Total volume of generation : 876 L
- pH duration time : 24 hours
